

For U.S. Government Customers

US Dept. of Defense SPOCK Program (Security Proof of Concept Keystone)

Melior, Inc. is proud to have been a member of the [SPOCK](#) program, a consortium of the US Department of Defense (DoD), US Government Agencies, and Civil Security Contractors, to promote practical, effective, and implementable security solutions.

- by exchanging information on COTS
- conducting demonstrations based on Vendor Security Claims
- producing reports on demonstration results

SPOCK is now being discontinued, as the NSA concentrates evaluation efforts under the [BAO program within the Information Assurance Directorate \(IAD\)](#). Melior strives to continue to provide CyberWarfare Defense solutions to U.S. National Security.

Notice to other SPOCK Members:

*Melior, Inc. presented the iSecure system for defense against distributed Denial-of-Service attacks and Infrastructure Cloaking against Penetration Testing as the last presenter at the final SPOCK meeting on **September 2nd, 2003**. See our website for the [Agenda \(unclassified\)](#) and the [Presentation \(PPT\)](#)*

- Melior is also working towards meeting the Common Criteria Validation for the iSecure product line.
- Information will be made available by request from Melior, Inc. or SPOCK (through CoAct, located in Columbia, Maryland, a Top Secret rated facility by the Defense Security Services, under the Department of Defense).
